

6267 Castille Ct.,  
Gloucester K1C 1X4

Mr. Max Yalden,  
Canadian Human Rights Commission,  
Ottawa.

June 24, 1989

Dear Mr. Yalden,

Surely the recent suicide of a Timmins man with environmental sensitivity is reason to reinforce your approach to Mr. Beatty on our behalf?

Please?

I'm tired of watching my friends go down simply because government's have irresponsibly stated this problem is illusory.

Surely you can't be satisfied by the dishonesty of Mr. Epp's last letter?

I appreciate Mr. Beatty writing Mr. Hauser, but surely such a matter of life and death(s) warrant your valuable input to Mr. Beatty?

Would you consider holding a news conference to suggest that Canadians become more familiar with the environmentally sensitive? I believe there would be an apolitical and positive way of doing that.

Sincerely,

DUPLICATE

Chris Brown  
(613) 837 7173

P.S. May I pass on my appreciation for John Dwyer's patience and continued encouragement? Considering the frustrations involved, and the difficulty this disability adds to stress-related activity, his encouragement has been important. It came at the very worst (best) time in my dealing with government, precisely when I was at my lowest.

P.P.S. I no longer pay taxes, as I believe the government has broken its social contract, and can, at this point, fairly be said to be directly responsible, or indirectly responsible through negligence, for the ongoing deaths of members of this disabled group.
